16. ABSTRACT

The U.S. Environmental Protection Agency is demonstrating and evaluating the use of photochemical models. These models require accurate and complete inventory data bases. To insure that all major volatile organic compound (VOC) sources are included in emission inventory data bases, and to insure that VOC emission inventories for photochemical nonattainment areas include all sources that are subject to Reasonably Available Control Technology (RACT), a directory of VOC sources covered by RACT requirements has been derived independently of EPA inventory data. The National Emission Data System (NEDS) was compared against this directory to determine VOC sources missing from NEDS.

February 1981

This document is issued by the Environmental Protection Agency to report technical data of interest to a limited number of readers. Copies are available free of charge to Federal employees, current EPA contractors and grantees, and nonprofit organizations - in limited quantities - from the Library Services Office (MD-35), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; or, for a fee, from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161.

This report was furnished to the Environmental Protection Agency by PEDCo Environmental, Inc., 1006 N. Bowen Road, Arlington, Texas 76012, in fulfillment of Contract No. 68-02-3512. The contents of this report are reproduced herein as received from PEDCo Environmental, Inc. The opinions, findings and conclusions expressed are those of the author and not necessarily those of the Environmental Protection Agency.

Publication No. EPA-450/4-81-018

# ACKNOWLEDGMENTS

PEDCo Environmental, Inc. prepared this report for the U.S. Environmental Protection Agency, Office of Air Quality Planning and Standards (OAQPS). Mr. Thomas N. Braverman was the OAQPS Task Manager. Mr. Thomas C. Ponder, Jr. served as the PEDCo Project Director, and Mr. Dilip H. Mehta served as the PEDCo Project Manager. Mr. Mehta and Mr. James A. Forbes were the principal authors.

## VOC SOURCES MISSING FROM THE NATIONAL EMISSIONS DATA SYSTEM

The U.S. Environmental Protection Agency (EPA) is demonstrating and evaluating the use of photochemical models. These models require accurate and complete inventory data bases. To ensure that all major sources of volatile organic compounds (VOC) are included in emission inventory data bases and that VOC emission inventories for photochemical oxidant nonattainment areas include all sources subject to Reasonably Available Control Technology (RACT), EPA contracted with PEDCo Environmental, Inc., to prepare a directory of VOC sources covered by RACT requirements. This directory has been derived independently of current information in the National Emissions Data System (NEDS) and is presented in three volumes.

Volume 1 includes the following Group 1 RACT source categories:

1. Automobile and light-duty truck surface coating plants
2. Can surface coating plants
3. Coil surface coating plants
4. Fabric surface coating plants
5. Large appliance surface coating plants
6. Metal furniture surface coating plants
7. Magnet wire surface coating plants
8. Paper products surface coating plants

Volume 2 includes the following Group 2 RACT source categories:

1. Petroleum refineries
2. Chemical synthesis pharmaceutical manufacturing plants
3. Pneumatic rubber tire manufacturing plants
4. Flatwood paneling surface coating plants
5. Industrial perchloroethylene drycleaners
6. Publication rotogravure printing companies
7. Packaging rotogravure and flexographic printing companies

Volume 3 includes the following Group 3 RACT source categories:

1. Fabric printing plants
2. Polymer and resin manufacturing plants
3. Styrene butadiene rubber manufacturing plants
4. Natural gas processing plants
5. Synthetic organic chemical manufacturing plants
6. Bulk gasoline terminals

Based on data in the directory, a list of VOC sources missing from NEDS has been prepared for the ozone nonattainment counties requesting an extension for attainment beyond 1982. These counties are listed in Table 1. This VOC source list is arranged alphabetically by state and by county within each state. The name, address, county, Air Quality Control Region (AQCR), and area photochemical oxidant attainment status for each source are listed.
